TECHNICAL SKILLS

Programming Languages

Python, Javascript, Node, C, C++, PHP and SQL.

Libraries and Frameworks

ReactJS, TailwindCSS, NextJS, Radix UI, Shadcn UI, Laravel, Pandas, Selenium and NumPy.

Databases

MySQL, PostgreSQL and Redis.

Tools:

AWS, DigitalOcean, Hetzner, Cloudflare, Vite, Superset, Git, Github, Google Workspace, Jira and Slack.

EXPERIENCE

SuperDM | Frontend Engineer (Short Term Project) [Bengaluru]

Nov 2024 - Present

- Collaborated closely with the team to prototype, build and test new features for one of their upcoming products.
- Improved the user interface (UI) and user experience (UX) of the platform, focusing on enhanced usability, accessibility, and visual appeal.

Flynterest | Technical Co-Founder [Remote]

May 2024 - Oct 2024

- Designed and built a web-based flight inventory management platform, streamlining ticket uploads, availability tracking, and real-time pricing updates for travel agents.
- Built a booking marketplace application to allow travel agents to search, compare, and book offline flight tickets aggregated from multiple agents ensuring fast response times.
- Built an admin back-office support application to manage agent accounts, track bookings, and handle ticket-related workflows, improving operational efficiency.
- Integrated payment gateway to streamline the online payment process.

Civic Data Lab | Full Stack Engineer [Bengaluru]

Jan 2022 - April 2024

- Contributed to data-driven projects aimed at improving governance and transparency in India in partnership with Rockefeller Foundation and Patrick J. McGovern Foundation.
- Built APIs for data scraping and ETL processes to aggregate district and constituency-level data across various state and central government schemes in India for multiple fiscal years.
- Built solutions for data extraction, transformation, visualization, and platform enhancement to support urban development and governmental initiatives.
- Enabled Ahmedabad Smart City to make data-driven decisions through actionable insights by building an Apache Superset-based dashboard to visualize grievances data.
- Revamped the OpenCity India platform to improve usability and reliability for hosting urban open datasets by improving design and performance of the platform.

Orchardly | Full Stack Engineer *[Remote]*

Jan 2021 - Dec 2021

- Built the core modules to manage orchards, including details like trees, varieties, locations, soil insights, areas, and weather conditions.
- Built the accounting system using double-entry accounting principles to ensure financial accuracy and compliance.
- Scaled from 0 to 500,000 req/day as a sole engineer by designing and implementing core backend functionalities and ensuring system scalability.
- Scaled from 500,000 to 6,000,000 req/day as one of the four team members by upgrading and optimizing infrastructure to handle increased traffic.
- Built a weather notification microservice by developing ETL and analysis module that sourced forecast data from external APIs.

OPEN-SOURCE CONTRIBUTIONS

laravel.io: Contributed Unsplash API, unit tests, UI refactors and dynamic meta image generator upgrade with caching to the laravel community portal.

Open Budgets India: Contributed scraping APIs and data pipeline (to run data processing and cleaning scripts) for state and central government financial data which is used to power the suite of Open Budgets India platforms.

tauseefsshah.com: Designed and developed my personal portfolio website.

AWARDS AND RECOGNITION

Chairman, ACM Jammu Chapter: Led the ACM Jammu Chapter, a professional community dedicated to advancing computing and fostering innovation among students and professionals.

Winner, Smart India Hackathon: Led the winning team of Smart India Hackathon 2019 held at IIT Kanpur, recognized for developing an innovative and impactful solution.

Awardee, British Petroleum USA STEM Exchange Program: Selected as one of three awardees nationwide for a 12-month student exchange program to the USA, recognizing high-achieving STEM students for their academic excellence and innovative potential.

President, Cybercrew Srinagar Chapter: Led the Cybercrew Srinagar Chapter, a student-led community dedicated to increasing children's curiosity about computers and technology.

EDUCATION

Bachelors In Engineering - Computer Science

Aug 2018 - July 2022

Model Institute of Engineering and Technology

Percentage: 72%
